

Life & Health Care brings the delivery of care to you or your loved one right in the home, providing both security and peace of mind to the individual and their family. We work with you, your loved ones, and your physician to assess the type of care needed and create a plan of care specifically tailored to meet those individual needs.

As a member of the Home Care Association of America, we maintain the highest standard practices in the field as well as staying up-to-speed on the information of a constantly evolving health care industry.

Care when you need it,
wherever home may be.

Life & Health Care

A Private Home Care Agency

OUR SERVICES

As more Americans choose to remain in their homes while they age, finding the right type of in-home care for loved ones can be a challenge. Life & Health Care's services provide a secure, qualified and affordable option for families.

Life & Health Care offers a wide range of care from homemaker services to nursing and medication management, as well as everything in between. The in-home delivery of these services is what allows an aging person to remain in their own residence.

Currently there is a gap in care for this population of people who fall between optimum health and needing institutionalized care. Life & Health Care offers the option for the individual to remain in their home safely, with the additional support we provide.

Call today (515) 832-4442 to schedule a free no obligation assessment.
